

# SAFETY FOR YOUR DOCK *Life*

EZ Dock Security Curbing's fade resistant recycled polyethylene construction provides a safe border around dock edges for wheelchairs. The curbing is clean, non-toxic, will not rust, rot and needs no maintenance, other than cleaning. The dark brown and black curbing provides a visible color contrast vs the lighter beige and grey dock sections. Curbing comes in 118" long sections with 2 1/2" x 3 1/2" cross sections. This stop is designed to be securely fastened to the molded in T-nuts that are located on the perimeter of the dock. Installers will need to cut, fit and drill holes in the proper locations to attach the curbing.
